

TOTALINE OILS

Synthetic Ester Refrigeration Oil

Totaline oils are formulated from selected polyol-ester base stocks and additives specifically for lubricating the compressors and system components of air conditioning and refrigeration systems. They are compatible with HFC refrigerants which make them suitable for many applications.

Totaline oils offer these performance advantages

- Long lubricant life
- Properly controlled miscibility
- High system efficiency
- Excellent high temperature stability
- Excellent hydrolytic stability
- Outstanding protection against compressor wear
